

Did you know?

In 2016 Scotland's electricity exports to the rest of the UK were worth £5.8Bn.

This is not included in Scotland's current GDP figures.

Remember when they told us we'd be £500 worse off with Scottish Independence? We're £900 worse off with Brexit, which we didn't vote for, and it hasn't even happened yet. Can Scotland afford to stay in the Union?
